Checklist of Deliverables for the Full-Stack Developer Test

Participants can use this checklist to ensure all required deliverables are completed and submitted:

Codebase

- ☑ Backend API implementation is completed and functional.
- ☑ Frontend code for the user interface is developed and ready to share.

Video recording

- ☑ Video demonstrating the functionality and key features of the developed application.

Documentation

- ☑ Clear instructions for:
  - ☐ Setting up and running the project locally.
  - ☐ Embedding or integrating the frontend code.
- ☑ API Documentation includes:
  - ☐ List of endpoints.
  - ☐ Request and response formats with examples.
  - ☐ Explanation of edge cases handled.

Test Cases

- ☑ At least **3 test cases** are written for each API endpoint.
- ☑ Test cases include handling edge cases.

Optional Deliverable

- ☐ A **link to the hosted app** is provided (if applicable).
